

RAPHAEL OMONZOKPIA DEMILADE

Address: Barcelona, Spain — Email: raphaelomonzokpia1@gmail.com — Phone: (+34) 642 829 417

LinkedIn — GitHub — Data Portfolio

PROFESSIONAL SUMMARY

Data and Engineering Analyst with 3+ years of experience applying data analytics, research methods, and engineering principles across energy, sustainability, technology, and consulting environments. Strong background in SQL-, Python-, and spreadsheet-driven analysis, with hands-on experience in data cleaning, visualization, and experimental data interpretation. Proven ability to translate complex technical and operational data into actionable insights that support decision-making, process optimization, and research outcomes. Experienced working in cross-functional, international teams, with exposure to AI-assisted data workflows, energy systems analysis, and project coordination.

SKILLS

Technical Skills:

- Languages: SQL, Python, R, GAMS, HTML, CSS
- Frameworks: Pandas, NumPy, Scikit-Learn, Matplotlib, ggplot
- Tools: Corel DRAW, AutoCAD, Microsoft Office, Tableau, MySQL, Power BI, Artec Studio, OpenLCA, TIMES (Veda Online), HubSpot and Jira Software
- Platforms: PyCharm, Jupyter Notebook, Visual Studio Code, Spyder, R Studio, Proteus and Wordpress
- Soft Skills: Analytical Problem-Solving, Clear Technical and Non-Technical Communication, Cross-Functional Collaboration, Critical Thinking, Stakeholder Engagement

PROFESSIONAL EXPERIENCE

SERMED Project

Barcelona, Spain

Digital Learning Systems Developer

February 2026 – Present

- Designed structured curricula, training programs, and course modules using established instructional design methodologies and frameworks.
- Developed engaging learning content, including e-learning modules, presentations, assessments, and multimedia-based instructional materials.
- Integrated training content into Learning Management Systems (LMS) and tracked learner progress, completion, and performance metrics.

TELUS Digital (Remote)

Las Vegas, United States

Data-AI Annotator Specialist

September 2025 – Present

- Evaluated high-volume multimodal GenAI outputs (text, image, audio, video) using structured factuality and helpfulness rubrics, supporting data-driven model benchmarking and selection decisions.
- Conducted context-aware omission and regeneration analysis to identify hallucinations and visual inconsistencies, improving training data quality for image restoration and personalization workflows.
- Performed systematic pairwise comparisons to surface failure patterns and assess relative model performance across narrative and audio outputs.
- Authored clear, evidence-based evaluation rationales, accelerating review cycles and strengthening feedback loops between annotation, evaluation, and model tuning teams.
- Maintained high throughput and annotation accuracy in a fast-paced production environment by adapting quickly to evolving guidelines and calibration standards.

Universitat Politècnica de Catalunya (UPC)

Barcelona, Spain

Data Quality Analyst

March 2025 – June 2025

- Ensured high data accuracy by systematically verifying and categorizing spreadsheet records through structured web research and cross-referencing, resolving discrepancies in resident location data.
- Applied consistent data validation and filtering techniques to identify, correct, and document inconsistencies, improving the reliability and auditability of critical datasets.
- Maintained clear documentation of data quality checks, verification logic, and corrections to support transparency, repeatability, and downstream analysis.

Laboratory Assistant

October 2024 – February 2025

- Executed structured experimental measurements on sprayed mortar mixes using rheological and calorimetric instruments, improving data consistency and repeatability across testing cycles.
- Designed and executed controlled material preparation protocols to compare binder types, producing clean, comparable datasets for early-strength and hydration analysis.
- Analyzed hydration and strength development data from adiabatic calorimetry and compression tests to identify performance patterns and optimal formulations.
- Maintained experimental data integrity by managing equipment calibration, documentation, and standardized testing procedures.
- Produced high-resolution 3D geometry data using Artec Studio and supported quantitative comparisons in MATLAB, improving analytical efficiency in material performance evaluation.

Memphis Innovative

Lagos State, Nigeria

IT Consultant

August 2024 – October 2024

- Provided research-driven career and digital profile consulting to early-career professionals, supporting job market navigation through structured information gathering and analysis.
- Assisted clients in structuring experience, skills, and portfolios into role-aligned professional profiles, clearly communicating technical and analytical work to target employers.

Data Analyst

March 2023 – October 2024

- Analyzed large, structured datasets (~30k–100k+ records) using SQL and Python to understand user behavior, conversion patterns, and operational performance, identifying trends, anomalies, and optimization opportunities across multiple business functions.
- Designed and maintained core performance metrics and KPIs aligned with business objectives, supporting evaluation of product changes, personalization initiatives, and operational efficiency improvements.
- Analyzed outputs from machine-learning-assisted workflows by evaluating model-driven predictions and patterns against business metrics, helping stakeholders understand performance drivers and areas for optimization.
- Wrote optimized SQL queries to extract, clean, and transform data from multiple sources, improving data reliability and enabling faster exploratory analysis and recurring reporting workflows.
- Built and maintained interactive dashboards and recurring reports in Power BI and Tableau, enabling product, operations, and leadership teams to monitor performance, investigate anomalies, and track progress against strategic goals.

Nigerian Army Electrical & Mechanical Engineers

Oyo State, Nigeria

Electrical Technician

March 2022 – March 2023

- Collaborated with engineers in a structured workshop environment on a federally assigned role, supporting coordinated maintenance workflows and improving communication between technical teams.
- Performed systematic diagnostics, repair, and preventive maintenance on military vehicles and electrical equipment, ensuring reliability and readiness of critical assets.
- Executed scheduled servicing and repainting of military automobiles in line with operational standards, contributing to consistent asset performance and reduced rework.
- Delivered basic electrical installations and maintenance for private contracts outside the barracks, demonstrating technical versatility, adherence to safety protocols, and client-focused delivery.

EDUCATION

Master's Degree in Energy Engineering (in view)

2026

Universitat Politècnica de Catalunya (UPC), Barcelona, Spain

Bachelor's Degree in Electrical and Electronics Engineering (B.ENG)

2021

Federal University of Agriculture Abeokuta, Ogun, Nigeria

VOLUNTARY EXPERIENCE

University Network for Innovation, Technology and Engineering (Unite)

Barcelona, Spain

Logistics Assistant

February 2025 – March 2025

- Coordinated logistics across multiple participating universities, supporting efficient resource allocation and contributing to a noticeable reduction in scheduling conflicts during event execution.
- Organized venue setup, including seating arrangements, technical equipment, and accessibility measures, con-

tributing to smoother operations and improved participant satisfaction based on post-event feedback.

- Implemented a structured luggage collection and storage process, significantly reducing cases of misplaced items and improving overall event organization.
- Facilitated attendee check-ins and distributed event materials, reducing registration wait times and improving attendee flow and engagement throughout the event.

Olive-Vine Educational Consult and Tours Limited

Ogun State, Nigeria

Assistant Manager(Part-time)

September 2023 – October 2024

- Facilitated attendee check-ins and distributed event materials across recurring activities, reducing registration wait times and improving overall participant experience.
- Managed incoming and outgoing communications (emails, letters, and inquiries), including drafting and proof-reading correspondence to support timely and professional information flow.
- Created and formatted documents, reports, memos, and presentations using word processing tools (Microsoft Word, Google Docs), supporting administrative and operational needs.

INTERESTS & LANGUAGE

Interests: Networking, Counselling, Playing Chess/Draft, Playing Football and Volleyball

Language: English and Yoruba (Proficient), Spanish (Beginner)
